IMMEDIATE OPENING INTERMEDIATE HYDROGEOLOGIST OR GEOSCIENTIST

Closing Date: Until Position filled

Ecoscope Environmental Consultants Ltd. is a small environmental consulting company located in Kelowna, BC. We provide a broad range of environmental services for our clients, focusing primarily on biophysical inventory and mapping, ecological landuse planning, groundwater assessments, contaminated sites investigations, and fish and wildlife studies. Ecoscope offers exciting opportunities for individuals to work on a wide variety of projects throughout BC. We are currently seeking applications for an **Intermediate Hydrogeologist or Geoscientist**.

Job responsibilities are as follows:

- Coordinate, conduct and oversee field investigations, including drilling, test pitting, excavations, groundwater monitoring and sampling, and hydraulic response tests (e.g., slug tests).
- Compile, review and analyze collected data, prepare technical reports, write proposals, and liaise with various stakeholders including regulatory bodies, clients and associates.
- Manage and maintain schedules, budgets and tasks of small to mid-sized groundwater-related projects.
- Ensure compliance with applicable guidelines, regulations and standards.

The ideal candidate will possess the following qualifications, skills, and experience:

- A minimum Bachelor's degree in geosciences or engineering
- A minimum 3 years' experience in the consulting industry or other relevant industry. Preference will be given to individuals licensed with EGBC as a P.Geo or P.Eng.
- Experience with aquifer and groundwater resource assessment, including but not limited to well and aquifer testing and analysis, groundwater license applications, and proof of water studies.
- Experience with wastewater and stormwater disposal to ground assessments, including BC Sewerage System Regulation (SSR) and Municipal Wastewater Regulation (MWR) compliance studies, onsite disposal feasibility assessments, rapid infiltration assessments and stormwater management and disposal studies.
- Experience with contaminated sites investigations would be an asset, including Phase I/II/III ESAs, Stage 1 and 2 PSIs, detailed site investigations (DSIs) and remediation.
- Demonstrated familiarity with provincial guidelines and regulations. An understanding of various BC Interior municipal regulations and bylaw requirements would be a strong asset.
- Strong field-based experience with physical hydrogeology, groundwater supply and contaminated sites investigations.
- Strong written and verbal communication skills and excellent time management (examples may be requested) combined with an aptitude for business development and project management.

Interested persons are encouraged to submit resumes electronically or in person with a cover letter detailing your experience to: ecoscape@ecoscapeltd.com. We thank all those interested in this opportunity; however, only those short-listed will be contacted. Short-listed candidates can expect to appear in person for an interview at our Kelowna office. We will consider reasonable travel expenses for you to appear for an interview following a pre phone interview.
